

Underwater Treasures

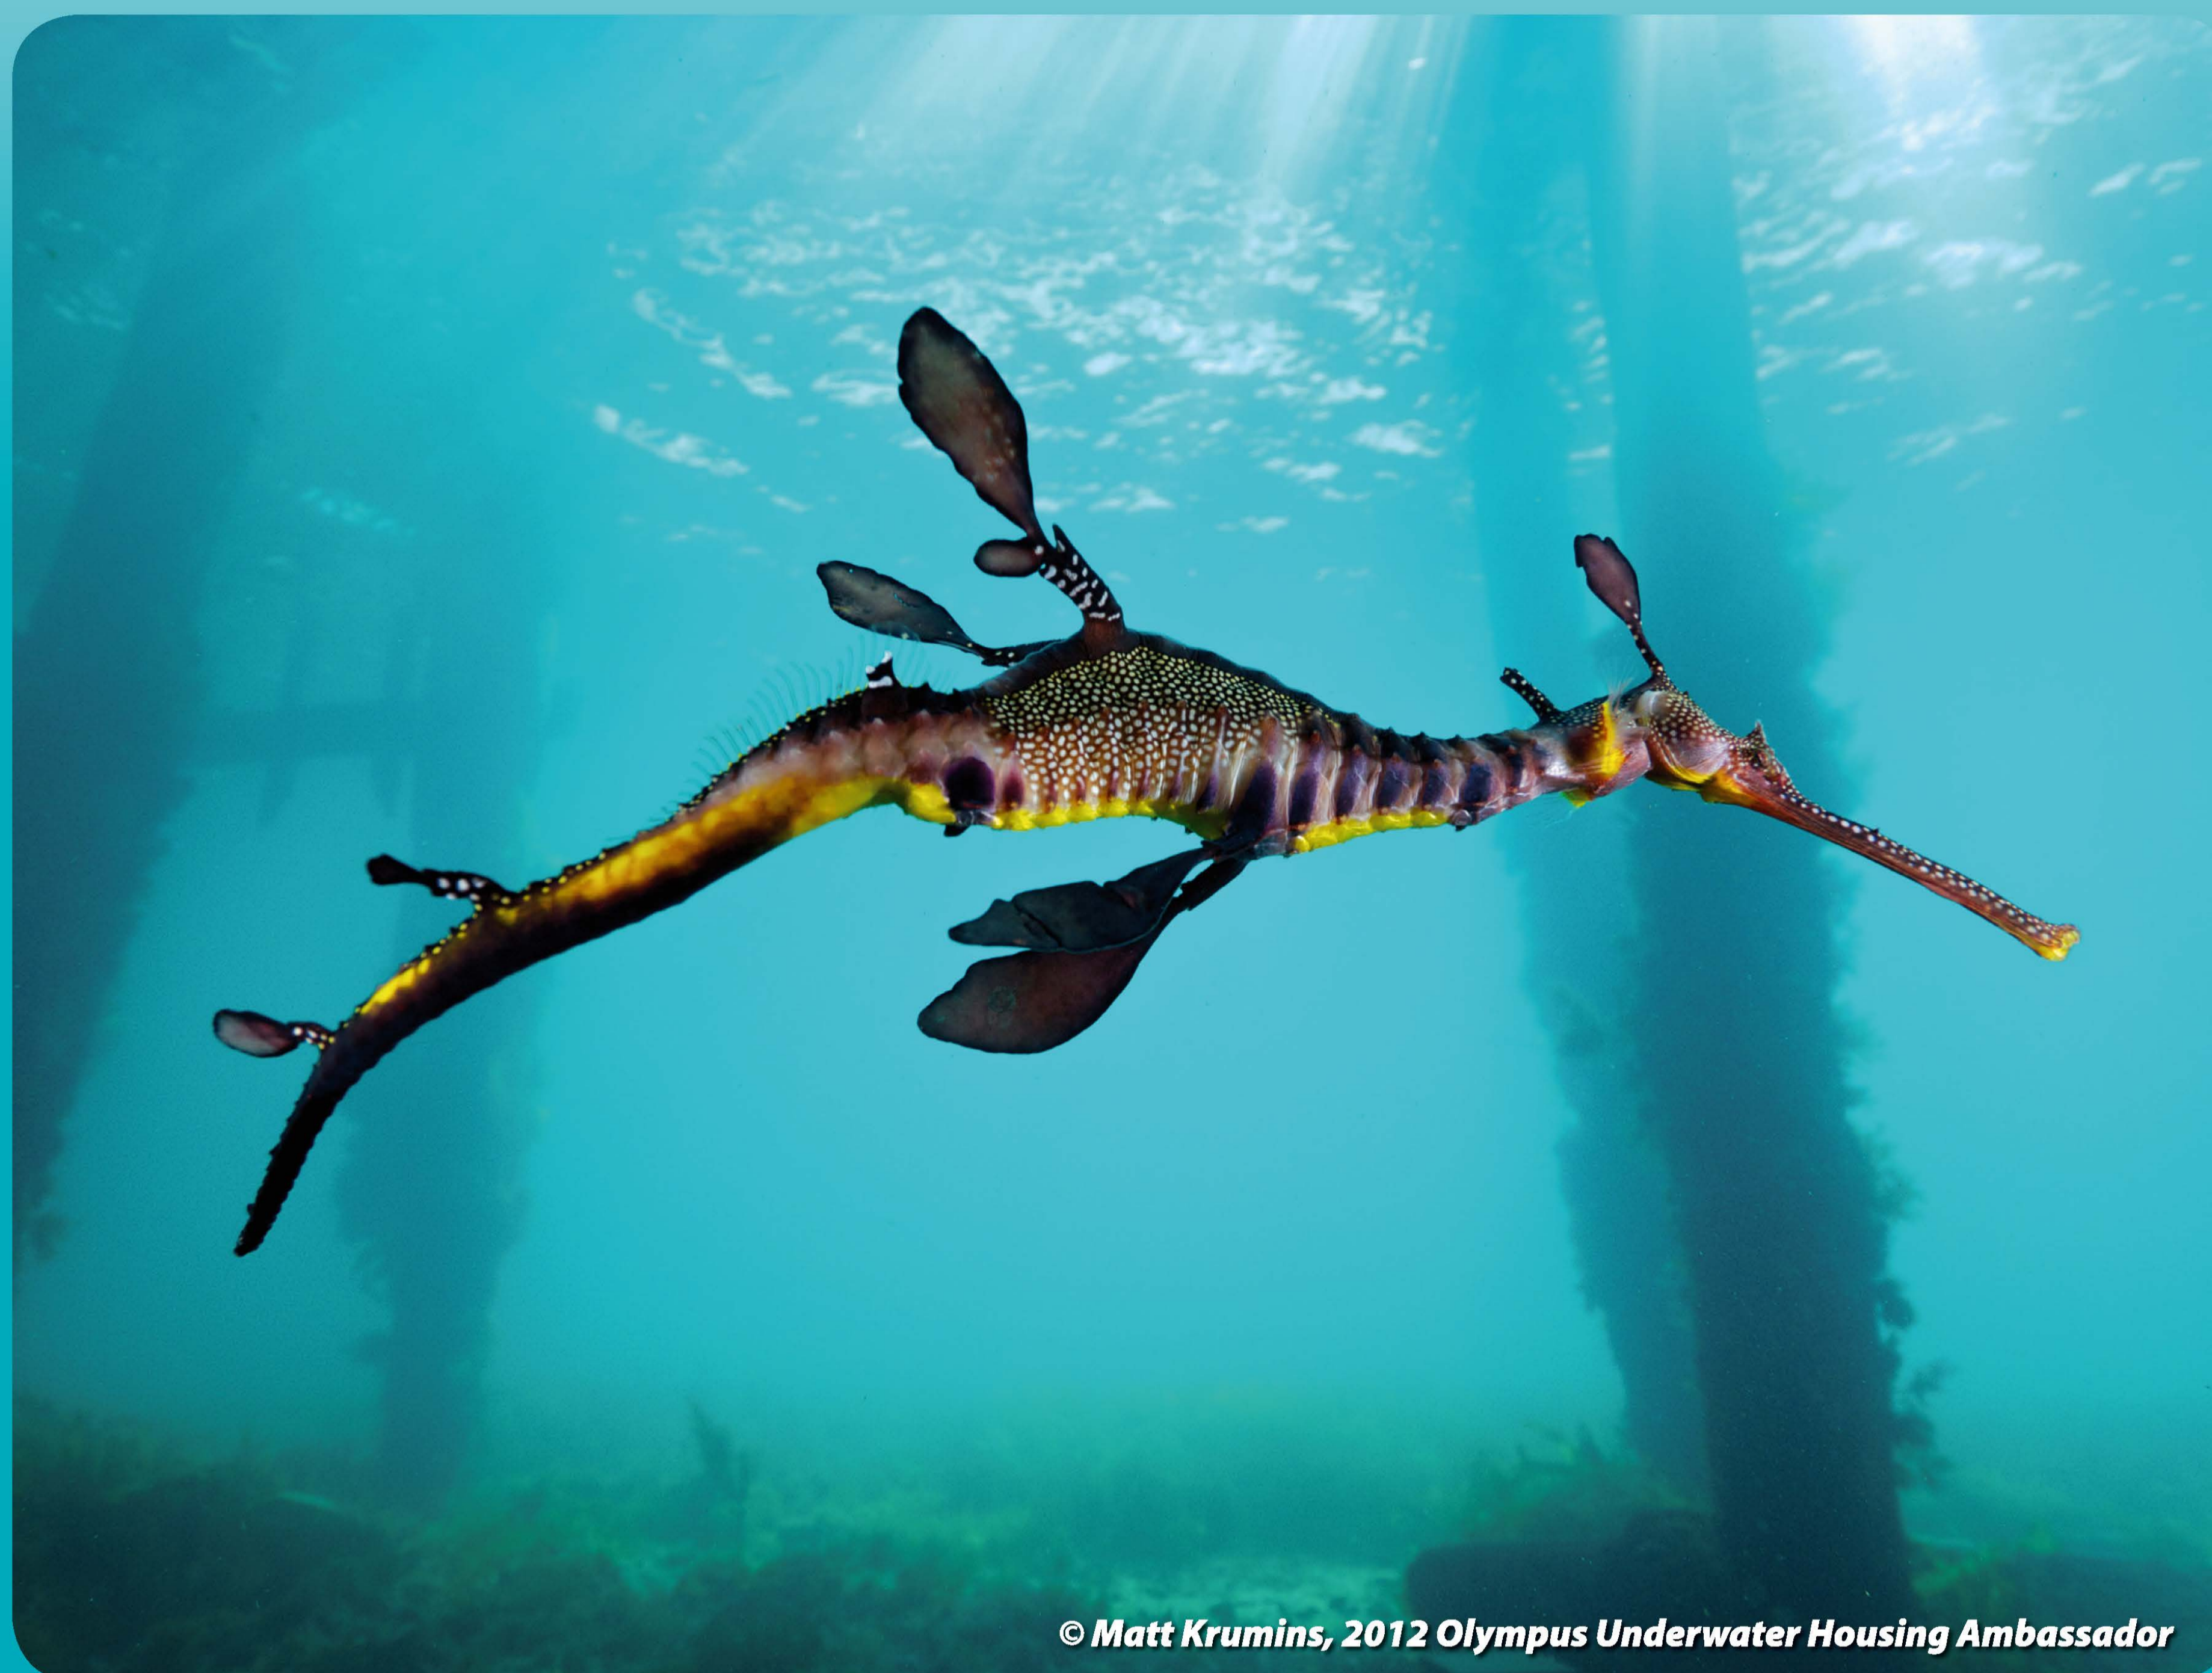

The Yaringa Marine National Park sits offshore of Casey

Quick facts

- Rocky reefs, sandy plains and sponge gardens are home to many species
- Abalone, crayfish and crabs live with weedy seadragons, seahorses and nudibranchs
- Seagrass meadows are a 'fish nursery' for juvenile fish

What you can do

- Obey all rules and regulations when in the Marine National Parks
- When boating, dispose of rubbish onshore and avoid discharging waste and ballast
- Explore the underwater treasures by diving and snorkelling
